Natural Antiseptic & Healing Wipes

For Dogs, Cats,
Small Mammals & Horses

Dermatological, drying, whitening, degreasing,
hygienic wipes for skin care and health

Phosphates,
DEA and Parabens
FREE

Introduction

Topical therapy has received growing attention in the management of many dermatological conditions either as a single therapy, or as an adjuvant to systemic treatments. Topical therapy provides multiple advantages:

- Allows treatment to be applied directly and only over the affected area, increasing its effectiveness.
- Reduces the risk of generalized systemic adverse effects.
- Allows the use of some active ingredients that could be potentially toxic.
- Can be used to prevent recurrences once an active infection has been resolved.

For topical treatments to be effective, it is important that they are easy to apply and well tolerated by patients and their caregivers.

Dermatological wipes are a good option for areas where shampoo therapy can be difficult to apply (head, extremities) and for animals that do not tolerate bathing. They also provide extra benefits for its mechanical cleansing action (they allow to reduce the number of microorganisms on the skin surface and help to remove debris and environmental allergens).

Product Facts

Boric acid	2 %
Acetic acid	2 %

With *Aloe barbadensis* leaf juice, *Hamamelis virginiana* (witch hazel) extract, *Chamomilla recutita* (matricaria) flower extract.

Also contains: water, glycerin, propylene glycol, fragrance, sodium hydroxide, sodium laureth sulfate, polysorbate 20, sodium benzoate butylene glycol, glucose, lactic acid, potassium sorbate, bisabolol.

Characteristics

- **Super saturated** with unique formula solution.
- **Antibiotic and corticosteroid free** - Does not generate antimicrobial resistance.
- **High quality fabric:**
 - **Honeycomb textured for better elimination of debris, secretions, and exudate.**
 - **100% biodegradable.**
- **Large size** - Suitable for large animals or expansive affected areas.
- Can **be easily** torn for **smaller animals** or **several spot cleanings**.
- **Convenient** - Flowpack for one wipe at a time.
- Gentle **soft wipes** with pleasant scent.

Recommended Use

- Cleanses areas before specific veterinary treatment (ideally 2 hours before) for pododermatitis, pyoderma and areas affected by *Malassezia* spp.
- Cleans and cares for skin folds, facial wrinkles, mouth creases, vulvar folds, ear flaps, interdigital areas, perianal areas and more.
- Dries overly moist skin areas.
- Cleans, whitens, and decreases oily tear stains.
- Cleans after emptying anal glands.

Directions for Use

Gently rub the affected area with wipes.

- **Initial use:** Twice a day for two weeks.
- **Maintenance use:** Once a day as needed or as directed by your veterinarian.

Cutania[®] Skin Control Wipes

Natural Antiseptic & Healing Wipes

Mechanism of Action

- CUTANIA[®] Skin Control Wipes are highly impregnated wipes with a unique combination of components, with synergistic effects.
- Boric and acetic acids provide drying, astringent, degreasing and whitening actions, that make them particularly useful in lesions such as wet eczema or dermatitis of the folds. They also have antibacterial and antifungal properties and keratolytic, keratoplastic, and astringent activities.
- *Aloe barbadensis* and *Chamomilla recutita* help to support skin regeneration. Aloe vera (*Aloe barbadensis*) is a plant of the *Liliaceae* family. It is used topically for its healing and therapeutic properties, especially for its anti-inflammatory effects. Studies indicate that Aloe Vera reduces healing time in wounds and burns in dogs and cats.
- Chamomile (*Chamomilla recutita*) is a medicinal plant of the *Asteraceae* family, with antimicrobial, antispasmodic and anti-inflammatory properties, especially in topical application. The main components include phenolic compounds, essentially flavonoids.
- *Hamamelis virginiana* (which hazel) leaves contain a high percentage of tannins and flavonoids. It has been used as an astringent, vasoconstrictor, and anti-inflammatory. In addition, it contains other natural compounds such as proanthocyanins that give it antioxidant properties.
- The honeycombed textured fabric aids in the cleaning and elimination of detritus and exudates from skin lesions, favoring the action of the active ingredients.

Cautions

For animal use only. Avoid contact with eyes and mucus membranes. Keep out of reach of children and animals.
Wash hands after using.
