

# Aster™

## TrisEDTA Wipes

Cleansing and antiseptic periocular wipes.

**Optimal Periocular Health**

**50 textured wipes,  
2.25" diameter**

**For Dogs,  
Cats & Horses**

### CHARACTERISTICS

- Hypoallergenic plant-based textured fabric.
- For sensitive skin and tough cleansing action.
- Super saturated with ingredients for elimination of tear stains, secretions, and exudate.
- Soft gentle pH neutral wipes.
- Solution does not cause injury if accidentally contacts cornea.
- Scent free.

### PRODUCT FACTS

Tromethamine base	0.2 %
Disodium EDTA	0.05 %
Chlorhexidine Gluconate	0.002 %
Tromethamine HCl qs to pH	6.8-7.2

### RECOMMENDED USE

- For dogs, cats, small animals, and horses.
- Cleanses debris and reduces odor around eyes due to excessive tearing.
- Eliminates ocular secretions.
- Provides specific daily hygiene and care around eyes.
- Can be used alone or to facilitate action of antibiotics.
- Favors application of veterinary ophthalmic products.

## DIRECTIONS FOR USE

**Initial use:** Wipe affected area twice a day for two weeks.

**Maintenance use:** Once a day as needed.

- **Tear stains:** Trim the affected hair. Gently wipe the periocular region with the wipe in a circular motion towards the outside of the eye.
- **Daily hygiene:** Gently cleanse hair and skin around the eye to remove debris.

## INACTIVE INGREDIENTS

Benzalkonium chloride, water.

## CAUTIONS

For use on dogs, cats, small animals, and horses. Avoid contact with eyes and mucus membranes. Keep out of reach of other animals and children.

## MECHANISM OF ACTION

Tromethamine/EDTA (Tris-EDTA) enhances veterinary treatment of periocular pyoderma.

Chlorhexidine disinfects areas that have debris and exudate.

Tris EDTA exhibits chelating effect over calcium and magnesium components of the cell membranes of microorganisms to decrease stability and increase permeability, thereby potentiating antibiotic effects.
